Care Philosophy

I believe every patient should be an informed participant in her health care. I provide care in a professional and relaxed manner in which my patients do not feel rushed but feel comfortable asking questions regarding their health. We discuss together treatment choices and develop a care plan that is mutually agreeable.

My patients feel comfortable calling me with questions and all phone calls are returned before the end of the day. Your concerns about your health and well-being are important to me.

Special Interests

High-risk obstetrics, operative laparoscopy and menopausal medicine, alternatives to hysterectomy, the health of young adults and the treatment of heavy menstrual cycles.
